

Doncaster's Festival of Research

Tuesday
17th October
2017

I firmly believe that the Chimp Management course and the skills it has given me have probably prevented me from 'burning out' something which I was perilously close to before the programme.

Putting
neuroscience
into practice

This course has truly changed my life. It opened my eyes. Since then and with the resources learned I have been able to help many patients but especially myself. People around me can tell the difference. I have strongly recommended this course to other colleagues.

Prof Steve Peters and his Team will be presenting the results of some of their recent work using the ground-breaking model, created by Prof Peters, The Chimp Paradox, within the NHS.

The 2 areas of work that will be showcased at this festival are a number of Primary Care projects and also a drug and alcohol programme.
